**Webcast:** <https://wsw.meetmax.com/admin/presenterlinks/?423155808&group=TbkBHEif>

### About Palladyne AI

Palladyne AI (NASDAQ: PDYN) is a U.S.-based defense and technology company delivering patented embodied artificial intelligence, collaborative autonomy solutions, advanced avionics, autonomous systems, and precision-manufactured components for defense and industrial markets. Through its GuideTech engineering services subsidiary and its manufacturing companies, Palladyne AI operates as a vertically integrated platform capable of executing across the full value chain — from component production and systems integration to autonomy software and mission-level orchestration.

Palladyne AI's embodied AI is designed to operate in complex, contested, and high-risk environments, enabling distributed tasking, human-on-the-loop decision-making, degraded-communications resilience, and multi-domain coordination. Its platform-agnostic autonomy stack combines real-time sensor fusion, adaptive AI models, and edge-native orchestration — without vendor lock-in — across air, ground, maritime, and industrial domains. For more information on Palladyne AI, please visit [www.palladyneai.com](http://www.palladyneai.com).
